Programming and Data Analytics Module 1

Lecture 1: Course Introduction

Outline

1 Course introduction

2 Sneak preview of Module 2

3 Let's Kahoot!

4 Overview to programming

Andrea Vandin 2 of 35

Note on the 2-modules structure

2-modules structure: http://bit.ly/PDASSSA21_22

As you know, this course is the first module of a teaching unit of two modules. Intuitively

- M1: Module 1 focuses on programming
- M2: Module 2 focuses on data analysis and machine learning

Students can attend single modules.

M1 gives the necessary background for M2

These slides focus on M1

Andrea Vandin 3 of 35

Note on the 2-modules structure

2-modules structure: http://bit.ly/PDASSSA21_22

As you know, this course is the first module of a teaching unit of two modules. Intuitively

- M1: Module 1 focuses on programming
- M2: Module 2 focuses on data analysis and machine learning

Students can attend single modules.

M1 gives the necessary background for M2

These slides focus on M1

Previous edition, A.Y. 2019/2020

M1 is a re-edition of course **Introduction to Programming in Python** held by us last year for the Allievi Ordinari of SSSA

• If you have attended it, and plan to attend M2, you can skip to it

Andrea Vandin 3 of 35

Previous edition, A.Y. 2020/2021

M1 is a re-edition of Intro to Programming & Data Processing

• If you have attended it, and plan to attend M2, you can skip to it

As suggested by your colleagues, this year M2 has twice the hours

Andrea Vandin 4 of 35

Course Responsible

- Course responsible: Andrea Vandin
 - ★ andrea.vandin@santannapisa.it
 - ★ Tenure-track Assistant Professor in Computer Science at Institute of Economics & EMbeDS @ SSSA, Adjunct Associate Professor at DTU Technical University of Denamrk
 - ★ Formerly:
 - Associate Professor in Computer Science at DTU Technical University of Denmark
 - Most related teaching activity: responsible for 3 years of course 'Programming in C++ for non-computer scientists', 250 students
- Co-lecturer: Daniele Licari
 - ★ daniele.licari@santannapisa.it
 - ★ EMbeDS Data Engineer
 - ★ Great expert of Python and data analysis

Andrea Vandin 5 of 35

Course References & Material

- Webpages of the course:
 - ★ http://bit.ly/PDASSSA21_22
 - ▶ Slides and examples from the lectures, further materials and links
 - ► Weekly coding assignments
- Suggested books:
 - ★ M. Lutz, Learning Python;
 - ★ W. McKinney, Python for Data Analysis.
- Well-done tutorial: https://docs.python.org/3/tutorial/
- Software
 - ★ Python: https://www.python.org/
 - ★ Python editor: JupyterLab https://jupyter.org/
 - ★ Setup your machine: http://bit.ly/PDASSSA21_22

Andrea Vandin 6 of 35

Tentative Course Description - M1

This module will

introduce students to the fundamental principles of structured programming, with basic applications to data processing. It starts from basic notions of programming (variables, data types, collections, control & repetition structures, functions & modules), and progresses to basic data processing functionalities (loading, manipulation, and visualization of CSV data).

Andrea Vandin 7 of 35

Tentative Course Description - M1

This module will

introduce students to the fundamental principles of structured programming, with basic applications to data processing. It starts from basic notions of programming (variables, data types, collections, control & repetition structures, functions & modules), and progresses to basic data processing functionalities (loading, manipulation, and visualization of CSV data).

A student who has met the objectives of the course will

acquire an understanding of the issues involved in computer programming, to be able to make informed decisions. The student will be able to write simple to medium python programs of various nature, including those for reading, manipulating and visualizing data.

Andrea Vandin 7 of 35

Tentative Learning Objectives

A student who has met the objectives of the course will be able to:

- select and use the correct data types and collections for the problem at hand
- use and describe variables, operations, and control and repetition structures (if, loops)
- create and use functions and classes
- use libraries for I/O, data manipulation, and data visualization
- use principles of structured program design and methods
- discuss Python-related issues in a clear and concise way, possibly using on-line platforms

Andrea Vandin 8 of 35

Evaluation

- Regular coding assignments
 - ★ Available at http://bit.ly/PDASSSA21_22
 - Automatic tests for your code and hints to fix bugs
 - ► (Soft) deadlines: before the following class
 - ▶ Feel free to contact us for support
 - You will have to send to us your solutions before the exam.
 - ★ A fundamental learning tool of this course
- Oral Exam
 - ★ We will do an oral examination
 - starting from your solutions to the assignments
 - ► Another reason for doing your assignments!

★ Date: TBD

Andrea Vandin 9 of 35

Tentative Lecture Plan

	.,	ъ.	 -	l - ·
	#	Date	Time	Topic
	1	14/02	17:00-19:00	Course introduction
	2	16/02	15:00-18:00	Data types & operations
_	3	18/02	15:00-18:00	Collections
	4	21/02	15:00-18:00	Control and Repetition statements
	5	25/02	15:00-18:00	Functions
_	6	28/02	15:00-18:00	Modules & Exceptions & Object Oriented Programming
	7	04/03	15:00-18:00	Advanced libraries for data manipulation/visualization
-	_	TBD	TBD	Fxam

Andrea Vandin 10 of 35

Further info

- No previous experience on computer programming required
- Previous experience in writing small programs is advantageous
- We might adjust the course level according to your expertise and feedback

Andrea Vandin 11 of 35

Further info

- No previous experience on computer programming required
- Previous experience in writing small programs is advantageous
- We might adjust the course level according to your expertise and feedback
- You will never learn programming if you don't practice it!
 - ★ Therefore you have to regularly do all the assignments

Andrea Vandin 11 of 35

Ideas for an Effective Course

Live Programming & Assignments

We have blocks of 3 hours.

- First part:
 - Intro to week's topics & Live programming
 - ★ Not many slides
 - ★ Instead: we develop a few example programs
 - ► Please have your laptop ready! http://bit.ly/PDASSSA21_22
 - ▶ You find code in advance here
- Second part:
 - You consolidate your understanding working on the assignments
 - ★ Begin working on the assignments with our live support if needed
 - ★ Complete them offline before next class. Contact us if needed

Andrea Vandin 12 of 35

Ideas for an Effective Course

Live Programming & Assignments

We have blocks of 3 hours.

- First part: Intro to week's topics & Live programming
 - ★ Not many slides
 - ★ Instead: we develop a few example programs
 - ► Please have your laptop ready! http://bit.ly/PDASSSA21_22
 - ▶ You find code in advance here
- Second part:

You consolidate your understanding working on the assignments

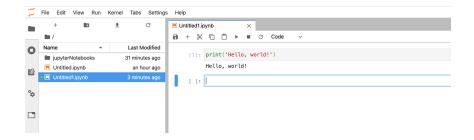

- ★ Begin working on the assignments with our live support if needed
- ★ Complete them offline before next class. Contact us if needed

However, we have the ambitious goal of covering many topics necessary to introduce you to programming and data processing in just 20 hours. Hence we might skip some second parts.

Andrea Vandin 12 of 35

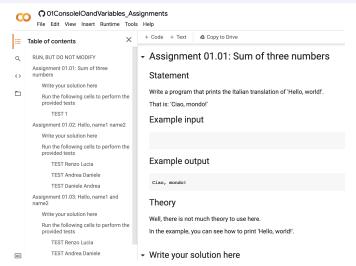

Live Programming

Find the JupyterLab notebooks at http://bit.ly/PDASSSA21_22

Andrea Vandin 13 of 35

Colab

- Each lecture comes with a set of simple coding assignments
 - ★ Links available in the wiki page for slides and further material

Andrea Vandin 14 of 35

Colab

- Colab is a Google service similar to Google docs
 - ★ but for python notebooks.
 - ★ no installation required
- Each set of assignments is actually a python notebook
- We implemented in Colab autograding functionalities
 - ★ to test your solution
- If you prefer, you can also download them as jupyter notebooks

Andrea Vandin 15 of 35

Colab: auto-testing

- ▼ Write your solution here
 - Do not change the first line (def ...():)
 - · Maintain the given indentation
 - . You can run some tests by yourself by decommenting the last line

```
[3] def asgn01_01Hello_world():
    # This program prints 'Hello, world!':
    #print('Hello, world!')

# Can you change it so that it prints the same,
    #but in Italian?

print('Ciao, mondo')

#You can test independently your solution by executing the following line
#asgn01_01Hello_world()
```

▼ Run the following cells to perform the provided tests

```
TEST 1

Test []
The program prints 1 lines as expected.

Line 0
Test PAILED
Expected: Ciao, mondo!
Actual : Ciao, mondo
```

Andrea Vandin 16 of 35

Colab: auto-testing

- Write your solution here
 - Do not change the first line (def ...():)
 - · Maintain the given indentation
 - . You can run some tests by yourself by decommenting the last line

```
[ ] def asgn01_01Hello_world():
    # This program prints 'Hello, world!':
    #print('Hello, world!')

# Can you change it so that it prints the same,
    #but in Italian?

print('Ciao, mondo!')

#You can test independently your solution by executing the following line
#asgn01_01Hello_world()
```

Run the following cells to perform the provided tests

```
TEST 1

Test []
The program prints 1 lines as expected.
Line 0

Expected and actual output match: Ciao, mondol

Test PASSED!
```

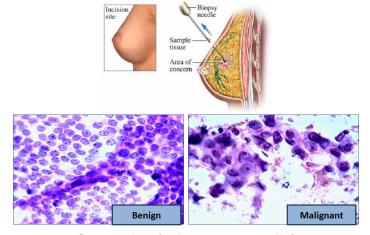

Andrea Vandin 17 of 35

Outline

- **1** Course introduction
- 2 Sneak preview of Module 2
- 3 Let's Kahoot!
- **4** Overview to programming

Andrea Vandin 18 of 35

Starting from the competences developed in the first module, we will study how to apply data analysis techniques from Machine learning

Can we classify them automatically?

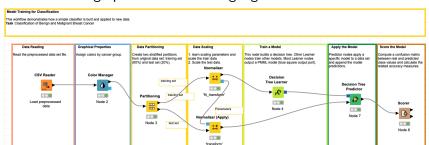

Andrea Vandin 19 of 35

We will go through a classic pipeline for these data analysis tasks

• with emphasis on data pre-processing.

We will use two alternative approaches

- Python: main focus
- Knime: a graphical workflow language

Andrea Vandin 20 of 35

Further advanced research-oriented topics of data-driven analysis like Process Mining

- 1. Lucy takes your order
- 2. Lucv notes down your address
- 3. Lucy notes down your preferred payment method
- 4. Luigi prepares your burger
- 5. Lucy grabs your can of soda
- 6. **Luigi** puts your burger in a box
- 7. Lucy wraps your order
- 8. Mike delivers vour order

- 1. Randy takes your order
- 2. Randy notes down your preferred payment method
- 3. Randy notes down your address
- 4. Luigi prepares your burger
- 5. **Luigi** puts your burger in a box
- 6. Randy wraps your order
- 7. John delivers your order

Andrea Vandin 21 of 35

¹Example from https://pm4py.fit.fraunhofer.de/

Evaluation

You will do the same on data of interest or on data on titanic sinking

• Would you have survived the sinking of the titanic?

Andrea Vandin 22 of 35

Outline

- Course introduction
- 2 Sneak preview of Module 2
- 3 Let's Kahoot!
- **4** Overview to programming

Andrea Vandin 23 of 35

Let's play a game on Kahoot!

- Using your smartphone or a second monitor
- Visit www.kahoot.it
- •
- Type the code we will give you during the class

Andrea Vandin 24 of 35

Outline

- **1** Course introduction
- 2 Sneak preview of Module 2
- 3 Let's Kahoot!
- **4** Overview to programming

Andrea Vandin 25 of 35

What is a program?

- A sequence of code instructions to control a machine
 - ★ Input/output
 - ★ Mathematical operations
 - ★ Conditional and repetitive executions
- A recipe to instruct a machine to execute instructions.
 - ★ We can't use a natural language.
 - ★ We need a programming language

Andrea Vandin 26 of 35

Programming languages

http://www.codingdojo.com/blog/the-7-most-in-demand-programming-languages-of-2019

Andrea Vandin 27 of 35

Programming languages

https://www.tiobe.com/tiobe-index/

The index can be used to check whether your programming skills are still up to date or to make a strategic decision about what programming language should be adopted when starting to build a new software system. The definition of the TIOBE index can be found here.

Feb 2021	Feb 2020	Change	Programming Language	Ratings	Change
1	2	^	С	16.34%	-0.43%
2	1	~	Java	11.29%	-6.07%
3	3		Python	10.86%	+1.52%
4	4		C++	6.88%	+0.71%
5	5		C#	4.44%	-1.48%

Andrea Vandin 28 of 35

4	4		C++	6.88%	+0.71%
5	5		C#	4.44%	-1.48%

May 2021	May 2020	Change	Programming Language	Ratings	Change
1	1		С	13.38%	-3.68%
2	3	^	Python	11.87%	+2.75%
3	2	•	Java	11.74%	-4.54%
4	4		C++	7.81%	+1.69%
5	5		C#	4.41%	+0.12%

Andrea Vandin 28 of 35

The Python Programming language

- High-level: almost human readable. Abstracts from hardware
- Beginner-friendly:
 - ★ streamlined syntax
 - ★ it is easy to write your first programs
- Free, open-source and multi-platform
- Developed since the 90s, therefore it has
 - ★ A wide community, and its popularity keeps increasing
 - ★ Many predefined software modules

Andrea Vandin 29 of 35

Python programs

- A sequence of python instructions to control a machine
- Python supports the most common programming styles
 - ★ Imperative: Statements are executed in sequence changing the state of the program (the variables)
 - ★ Procedural: The program is structured in reusable units named functions
 - ★ Object-oriented: The program is structured as a collection of interacting objects that send messages to each other.
 - ★ Functional: Statements are not written/executed as an ordered sequence of instructions. A computation is treated as the evaluation of a mathematical function.

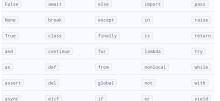

Andrea Vandin 30 of 35

Variables

Basic abstraction to represent units of data

A variable has a name and a value

Names can contain any letter, number, or the underscore

Note:

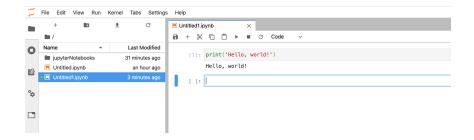

- ★ Cannot start with numbers
- ★ Cannot be a keyword
- ★ Names are case-sensitive
- We assign/update values to variables using assignment statements

```
month_number=3
month_name="April"
print("The number of",month_name,"is",month_number)
month_number=4
print("The number of",month_name,"is",month_number)
```

Andrea Vandin 31 of 35

Live Programming

Find the JupyterLab notebooks at http://bit.ly/PDASSSA21_22
